

Count and Organize Within Twenty: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Which group has more objects?

Group A

Group B

Answer: Group B

Compare the counted totals.

2. If the 11 objects in Group A are spread farther apart, how many are there?

Look for:

- Keeps the quantity unchanged.
- Explains that only the arrangement changes.

One possible response: 11; moving the objects does not add or remove any.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
