An invented survey

Invented practice data or scenario; not a report of a real study.  
In a fictional class of 24 students, 18 selected a garden as their preferred project. The writer claims: Every student in our town wants a garden. The survey included only this class and offered a choice between a garden and a mural. Students were not asked about other projects.

1. What broad claim does the writer make?

\_\_\_\_\_

2. How many students in the invented class selected the garden?

\_\_\_\_\_
