

Grade 3 Math: Groups, Area & Two-Step Problems

Use the matching sheet ID when checking answers.

Read each problem carefully and fill in the bubble corresponding to the correct answer.

1. A class puts 6 markers in each of 4 supply boxes. How many markers are there altogether?

Answer: C. 24

There are 4 equal groups of 6 markers: $4 \times 6 = 24$ markers.

2. A rectangular garden has 3 rows of 7 equal square tiles. What is its area in square units?

Answer: C. 21 square units

Count 3 groups of 7 unit squares: $3 \times 7 = 21$ square units.

3. A school has 150 tickets for a play. It sells 48 on Monday and 57 on Tuesday. How many tickets remain?

Answer: A. 45 tickets

$48 + 57 = 105$ tickets sold. $150 - 105 = 45$ tickets remain.
