

Measure With Equal Units: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Draw a line that covers 5 equal squares.

Look for:

- Maintains one unit size and a continuous length.

One possible response: Five equal units placed without gaps.

2. A desk is measured with large blocks and then small blocks. Must the counts be the same?

Look for:

- Distinguishes the object length from the unit count.

One possible response: No. Smaller units usually require more units for the same length.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
