

Connect Tables Graphs and Linear Rules: Practice Independently

Name: _____ Date: _____

Use the material to work through each task. Show the requested response.

One linear rule

The rule $y = 2x + 1$ adds 2 to y whenever x increases by 1.

x	y
-1	-1
0	1
1	3
2	5

1. Use $y = 2x + 1$ to find y at $x = 4$.

2. Write the equation for the graphed line.
