

Use a Number Line: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Draw a number line to show $4 + 3$.

Look for:

- Labels a regular scale.
- Shows correct direction and distance.

One possible response: Starts at 4, moves 3 units right, lands at 7.

2. Why does moving from 4 to 7 mean three steps, not four?

Look for:

- Distinguishes intervals from endpoints.

One possible response: Count the spaces moved: 4 to 5, 5 to 6, 6 to 7.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
