

Interpret Population Tables: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Suggest a planning question these groups could help investigate.

Look for:

- Connects data to a question without assuming exact need.

One possible response: What school or older-adult services might be needed?

2. Can this one table tell why age groups differ?

Look for:

- Distinguishes description from explanation.

One possible response: No. More data about births, migration and other factors would be needed.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
