

Interpret Population Tables

Use the matching sheet ID when checking answers.

Use the material to work through each task. Show the requested response.

1. Find the total population of Place A.

Answer: 1000

2. What fraction of Place A is age 65 or older?

Answer: $\frac{3}{10}$ or 30%

3. Which place has more people aged 0–14?

Answer: Place A

4. What percentage of Place B is aged 15–64?

Answer: 60%

5. Suggest a planning question these groups could help investigate.

Look for:

- Connects data to a question without assuming exact need.

One possible response: What school or older-adult services might be needed?

6. Can this one table tell why age groups differ?

Look for:

- Distinguishes description from explanation.

One possible response: No. More data about births, migration and other factors would be needed.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
