

Understand Regrouping in Addition

Name: _____ Date: _____

Use the material to work through each task. Show the requested response.

Exchange, then combine

For $27 + 15$, combine 2 tens and 1 ten, then 7 ones and 5 ones. Twelve ones become 1 ten and 2 ones. The total is 42.

1. How many tens and ones equal 13 ones?

2. Solve $36 + 27$.

3. Solve $48 + 16$.

4. Solve $29 + 34$.

5. Solve $23 + 14$. Is exchanging ten ones necessary?

6. A student writes $27 + 15 = 312$. Explain the error.
