

Find and Build Shapes: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Draw a triangle and a circle.

Look for:

- A triangle has three straight sides.
- A circle has a curved boundary.

One possible response: One closed three-sided shape and one circle.

2. A triangle is turned upside down. Is it still a triangle? Tell why.

Look for:

- Uses properties rather than the direction the shape points.

One possible response: Yes. It still has three straight sides.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
