

Human Body: The Five Senses and Sensory Organs

Use the matching sheet ID when checking answers.

Match each sensory organ on the left with the observation it allows you to make on the right.

1. Eyes (Sight) — Visual perception → Watching a rainbow appear across the blue sky after rain.
2. Ears (Hearing) — Auditory perception → Listening to the school bell chime and hearing birds sing in the trees.
3. Nose (Smell) — Olfactory perception → Sniffing freshly baked chocolate cookies in the kitchen oven.
4. Tongue (Taste) — Gustatory perception → Tasting sweetness in a ripe strawberry or saltiness in soup.
5. Skin & Hands (Touch) — Tactile perception → Feeling the softness of a fluffy bunny and the warmth of sunshine.
