

Read a Trade Network

Use the matching sheet ID when checking answers.

Use the material to work through each task. Show the requested response.

1. Which town produces pots?

Answer: Hill Town

2. Which town connects the two roads?

Answer: Hill Town

3. Why might River Town trade grain for pots?

Look for:

- Connects production and exchange.

One possible response: The towns have different goods that can meet needs.

4. What might happen if the road to Forest Town closes?

Look for:

- Uses the network connection.

One possible response: Timber trade may become harder or require another route.

5. Name a possible cost of trading along the network.

Look for:

- Identifies a plausible cost.

One possible response: Transport time, effort or risk.

6. Does the network show exact prices or guarantee fair trades?

Look for:

- Avoids inventing missing facts.

One possible response: No. Prices and terms are not supplied.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
