

Planet Order and Model Limits: Apply and Create

Use the matching sheet ID when checking answers.

Use what you learned to explain, construct or apply an idea.

1. Which is farther outward in this order: Uranus or Neptune?

Answer: Neptune

2. Does equal spacing in a planet list mean actual planet distances are equal?

Look for:

- Distinguishes order from scale.

One possible response: No. The list represents order, not distance.

Open responses use criteria and an illustrative response. Other well-supported responses can be acceptable.
