

Plan Color and Visual Emphasis: Practice Independently

Name: _____ Date: _____

Use the material to work through each task. Show the requested response.

A traditional art palette

In a common traditional art convention, reds, oranges and yellows are called warm, while blues and greens are called cool. These labels describe visual associations, not actual temperature. Contrast can create emphasis.

1. How might a bright warm shape stand out on a cool background?

2. Sketch a composition with one focal point. Label planned colors.
